  C, Java,Python

- Scripting Language :
  HTML, CSS

LANGUAGES

English, Kannada, Hindi

CAREER OBJECTIVE

Aspiring software engineer with strong programming skills, comprehensive training and experience in software development. Seeking a position to contribute innovative solutions and enhance user experiences.

INTERNSHIP EXPERIENCE

- Internship under Qspiders Campus Connect
- Online Internship at Bharath Intern in Web Development
- Online Internship at System Tron in Python

PROJECTS

- **A study of Image Fusion Algorithms using Deep learning:**
  The purpose of this project is to select the optimal picture fusion method, which will aid in the application of effective image fusion methods in the medical industry.
- **Unified Local Shops :**
  The project aims to bring together various local shops and businesses under one platform, making it easier for customers to find and purchase products/services from local establishments. Here we used Database to store the data and NodeJS for connectivity.
- **Travel Buddy Robot using UI Path:**
  Users input their travel details, including the source, travel date, and email ID. The robot then autonomously searches for the corresponding flight information, extracts relevant data, and compiles it into an Excel file.

COURSES

- Secured the NPTEL Certificate On Design and Analysis of Algorithms
- Coursera certificate on HTML, CSS
- Participated in the workshop on Game Development using Unity conducted by 99Games
- Completed UIPath Academy Automation Explorer Training
